(2) SANRAL calculates the compliance rate in Rand value due to invoices varying in terms of tariff due to class of vehicle, time-of-day, frequent user discount, etc. Additionally, it should also be noted that once a vehicle reaches the monthly cap, invoices are still issued even though the value is zero.

(a) The compliance rate for February 2017, based on Rand value was 29%.

(b) Due to the year-end processes and audits still to be concluded, the value of outstanding debt can't be disclosed. This will be available once the Auditor-General has concluded the audit on 31 July 2017. The audited results as at 31 March 2016, reflects the outstanding value (trade receivables), which would be for unregistered users, as R7 206 million.
